

Summary

UX leader and design systems engineer who connects research, inclusive design, and working code. At Reingold, I managed and mentored designers and led research and UX strategy for Phoenix.gov, Maximus, and LADRC. I created and maintain Natura11y, an open-source design ecosystem spanning Figma, HTML, React, icons, and documentation. My work combines system architecture, component design, accessibility, and AI-assisted workflows. I bring experience aligning stakeholders around a shared strategy and carrying design decisions through implementation.

Core Skills

Design Systems · Management & Mentorship · UX Research & Strategy · Digital Accessibility & Inclusive Design · Cross-Functional Collaboration · Interaction Design & Prototyping · Information Architecture · Journey & Workflow Mapping · Usability & Tree Testing · Front-End Development · AI-Assisted Design

Tools: Figma · Storybook · Git / GitHub · Miro / FigJam · Optimal Workshop · Adobe Creative Cloud · Jira / Confluence · VS Code · HTML / CSS / JavaScript · React / Astro · WordPress / Craft CMS · Claude / Cursor / Codex

Relevant Experience

UX/UI Director — Reingold

March 2022 – August 2026

- Led UX research and design for government and nonprofit programs. Managed and mentored UX designers through project direction, design critiques, feedback, and career development; stayed hands-on with research, information architecture, and interaction design.
- **Phoenix.gov (1.5+ million residents):** Led UX strategy, research, information architecture, and iterative wireframing across 40+ city departments. Tested the proposed sitemap with 92 residents and used the findings to refine paths to services. Developed shared navigation and page patterns that became the foundation of the design system. The redesigned site launched three months ahead of schedule.
- **State of Nebraska design system pilot:** Developed reusable Figma components and patterns aligned with an Adobe Experience Manager (AEM) rollout. Helped grow an exploratory pilot into work supporting a broader statewide implementation.
- **Maximus:** Led stakeholder interviews and developed personas and detailed user journeys. Facilitated an in-person sitemap workshop with the client to work through information architecture decisions.
- **Legal Aid Disaster Resource Center (LADRC):** Led qualitative research and usability testing remotely and in person at a legal aid conference in Des Moines. Recruited participants through multiple channels.
- **Global pediatric medical platform:** Led UX and design strategy for a platform connecting doctors worldwide to support pediatric cancer care. Facilitated stakeholder workshops and developed wireframes and high-fidelity designs.
- Advocated for accessibility throughout research and design across engagements.

Senior UX Designer — NYC Office of Technology & Innovation (OTI)

September 2017 – March 2022

- Led UX strategy, interaction design, and front-end implementation for public services and internal tools, working directly with agency staff and developers.
- Designed and built the front end for NYC PoleTop Manager, a GIS platform helping city staff and telecommunications partners manage utility poles, infrastructure reservations, and construction activity across all five boroughs.
- Mapped donation workflows with Materials for the Arts staff and designed its public website and management portal, connecting the needs of donors, participating organizations, warehouse staff, and volunteers.
- Led UX design and front-end development for Notify NYC, simplifying resident enrollment and creating staff tools for managing and publishing emergency alerts.
- Oversaw UX strategy for the NYC311 mobile app (iOS and Android) redesign.

Owner / Principal — Avidano Digital

2011 – Present (independent practice, concurrent with the full-time roles above)

- Created and maintain Natura11y, an open-source design ecosystem used across client projects. Built its Figma libraries, design tokens, icons, and accessible HTML and React components. Consolidated code and documentation in a monorepo, with shared Core styles and Storybook for comparing component appearance and behavior. Define component and accessibility guidance for AI-assisted design-to-code workflows in Claude and Codex, and review generated output against working examples.
- Designed UNICEF's Funding Marketplace across multiple phases, supporting teams in 80+ country offices. Worked with UNICEF stakeholders and Quark developers to translate fundraising, content management, reporting, and approval workflows into dashboards, wireframes, and production interfaces. The platform supported \$300M+ in toolkit revenue from 2010–2016.
- Led the website redesign for the Cheetah Conservation Fund on a custom WordPress multisite platform, achieving a 59% increase in donation page traffic and 38% growth in online campaign revenue.
- Led multiple redesigns of Visionlearning's bilingual science education platform as its needs evolved. Created responsive templates and custom learning tools, including an interactive periodic table, glossary definitions, and reading annotations.
- Redesigned and built Mr. Ellie Pooh's e-commerce website on a custom Shopify theme, achieving a 10× increase in online sales.

Early Experience

Early agency roles at Underline Communications, Bozell, Swanson Russell, and Spiegel Design Group (SDG), producing graphic and web design for regional and national clients.

Education

AOS, Graphic Design and Illustration — The Creative Center, College of Art and Design.
