

Summary

Senior product designer and design systems engineer with extensive experience creating public-facing products for government, nonprofits, education, and healthcare. At Reingold, led research and UX strategy for the Phoenix.gov redesign serving 1.5+ million residents. Previously led and contributed to Notify NYC and other city products during five years at NYC OTI. Through Avidano Digital, designed UNICEF's Funding Marketplace, created the Natura1ly accessibility-first design system, and led the Cheetah Conservation Fund redesign that increased donation-page traffic by 59% and campaign revenue by 38%. Strengths span the full product design lifecycle, from research and information architecture through interaction design, prototyping, engineering collaboration, design systems, and accessibility.

Core Skills

UX Research (Generative & Evaluative) • Information Architecture • Usability & Tree Testing • Stakeholder Research • Product Design Accessibility (WCAG) • Design Systems (Agentic) • Inclusive Design • Team Management & Mentorship • Front-End Development

Tools: Figma • Miro / FigJam • Optimal Workshop • Adobe Suite • Jira / Confluence • VS Code • HTML / CSS / JavaScript • React / Astro
WordPress / Craft CMS / Claude / Cursor / Codex

Relevant Experience

UX/UI Director — Reingold

March 2022 – August 2026

- Lead and contribute to qualitative and quantitative UX research across large government and mission-driven programs; manage and mentor UX designers through project direction, design critiques, feedback, and career development.
- **Phoenix.gov (city serving 1.5+ million residents):** Defined the research approach and led execution with the team. Conducted stakeholder interviews across 40+ city departments, created personas and user journeys, developed information architecture recommendations, and validated the new sitemap through tree testing with nearly 100 residents using Optimal Workshop. Translated findings into wireframes, navigation strategy, and low-fidelity prototypes. The redesign launched ahead of schedule with a cleaner information architecture, reduced content burden, and strong accessibility standards.
- **Legal Aid Disaster Resource Center (LADRC):** Led qualitative research, including remote usability testing over Zoom and in-person testing in Des Moines during a legal aid conference. Recruited participants through channels including Craigslist and Amazon Mechanical Turk.
- **Maximus:** Led a research-heavy engagement including stakeholder interviews, personas, and detailed user journeys, and facilitated information architecture work directly with the client, including an in-person sitemap workshop in Washington, DC.
- **State of Nebraska design system pilot:** Grew a small exploratory effort into work supporting a broader statewide implementation, translating design system thinking into practical Figma components and patterns aligned with an Adobe Experience Manager (AEM) rollout.
- **Global pediatric medical platform:** Led UX and design strategy for a platform connecting doctors worldwide to improve pediatric cancer care, facilitating stakeholder workshops and delivering wireframes and high-fidelity designs.
- Advocated for accessibility as an integral part of the research and design process across all engagements.

Senior UX Designer — NYC Office of Technology & Innovation (OTI)

September 2017 – March 2022

- Contributed to UX discovery through stakeholder interviews and internal research on public-facing city services.
- Designed the UI and developed the front-end for NYC Poletop Manager, a GIS mapping application used to track and manage 5G and smart-city infrastructure on utility poles across all five boroughs.
- Designed and built the front-end for the Materials for the Arts (MFTA) donation management system, streamlining manual workflows for warehouse staff and volunteers.
- Redesigned the Notify NYC website and custom admin portal for citywide emergency alert publishing.
- Oversaw UX strategy for the NYC311 mobile app (iOS and Android) redesign.

Owner / Principal — Avidano Digital

2011 – Present (independent practice, run concurrently with the full-time roles above)

- Created and maintain Natura11y, an accessibility-first design system with reusable patterns, documentation, Figma UI kits, and front-end components.
- Designed UNICEF's Funding Marketplace, a prescriptive CMS enabling 80+ country offices to manage fundraising campaigns; led interaction design, front-end development, and complex user flows. The platform supported over \$300 million in revenue from 2010–2016.
- Led the website redesign for the Cheetah Conservation Fund on a custom WordPress multisite platform, achieving a 59% increase in donation page traffic and 38% growth in online campaign revenue.
- Rebranded and redesigned Visionlearning's bilingual STEM education platform, improving accessibility and engagement across 100+ learning modules.
- Redesigned and built Mr. Ellie Pooh's e-commerce website on a custom Shopify theme, achieving a 10× increase in online sales.

Early Experience

Early agency roles at Underline Communications, Bozell, Swanson Russell, and Spiegel Design Group (SDG), producing graphic and web design for regional and national clients.

Education

AOS, Graphic Design and Illustration — The Creative Center, College of Art and Design.
